Res Mechanica **31** (1990) 498–499

CONTENTS OF VOLUME 31

Number 1

Structural Analysis of a Flange for Piping Systems Remote Handling 1
V. RENDA, L. VAN LOON, G. CERONI & L. PAPA (Italy)

An Experimental Study on Two-Story Reinforced Concrete Box-Shaped and Truncated Cone-Shaped Shear Walls 11
TETSUO KUBO, JIRO YAMANOUCHI, HIROSHI ASEGA, SHIN'ICHI IIZUKA, NOBUHIRO MACHIDA, YUKIO TAMAMURA & ICHIRO KURIHARA (Japan)

Damage in Sheet Forming of a Dual-Phase Steel 35
YIZENG ZHANG, XIAYU HU & JUQING HUANG (People's Republic of China)

Damping in Piping Systems Due to Local Nonlinearities 49
GERT KÖNIG & JOHANN-DIETRICH WÖRNER (FRG)

The Integrity of Steam Generator Tubes and Plugging Assessment 61
D. AZODI, H. SCHULZ & R. ARENZ (FRG)

The Importance of Phase Properties in the Generation of Synthetic Strong Earthquake Motions 77
TETSUO KUBO (Japan)

Announcements 101

Number 2

Mechanical Relaxation Effects in Relation to Ordering and Phase Transformations in Substitutional Alloys 105
F. POVOLO & J. HILLAIRET (France)

Adiabatic Shear Banding 133
YILONG BAI (People's Republic of China)

The Determination of Failure Probability Using Weibull Probability Statistics and the Finite Element Method 205
J. SMART (UK)

The Arrest of a Stress Corrosion Crack: I. Arrest in an Idealised Residual Stress Field 221
E. SMITH (UK)

Res Mechanica (31) (1990)—© 1991 Elsevier Science Publishers Ltd, England. Printed in Northern Ireland

Res Mechanica **31** (1990) 498–499

Number 3

Impact Properties of a Laminated Composite Based on Ultrahigh Carbon Steel and Hadfield Manganese Steel 233
SHYONG LEE (Taiwan), J. WADSWORTH & OLEG D. SHERBY (USA)

A Design Purpose Reliability Formulation for Cumulative and Maximum Plastic Deformations of Bilinear Hysteretic Systems 249
S. TASAKA (USA)

Structural Relaxation and Related Processes in Metallic Glasses 263
TAKAYUKI KOMATSU (Japan)

The High Temperature Corrosion Behaviour of Fe–Cr–Ni Alloys Exposed to Gaseous Oxidising/Sulphidising/Carburising Atmospheres 285
J. F. NORTON & J. A. KNEESHAW (The Netherlands)

The Determination of the Weibull Parameters for Brittle Materials from Three-Point Bend Tests 329
J. SMART (UK)

Comparison between the Normalized Creep or Stress Relaxation Function for a Lognormal and a Box Distribution of Relaxation Times 343
F. POVOLO (Argentina)

The Application of a Certain Rheological Model in Stress Relaxation Analysis of the Aluminium Alloy AlMg5Si 357
KRZYSZTOF GOŁOŚ (Poland)

Number 4

On the Coupling of Deformation Heating and Contact Friction during Strain Localization: Application to the Strip Friction Test 365
M. F. SHI, J. C. GERDEEN & E. C. AIFANTIS (USA)

Damping and Stiffness Behaviour of Reinforced Concrete under Cyclic Excitation: Experimental and Analytical Studies 391
EKKEHARD FEHLING & GERT KÖNIG (FRG)

Creep of Dispersion Strengthened Materials: A Critical Assessment 399
E. ARZT (FRG)

Simulation of Evolution of Microstructure in a Thermo–Mechanical Analysis of the Hot Rolling of Aluminium 455
B. K. CHEN, S. K. CHOI & P. F. THOMSON (Australia)

The Arrest of a Stress Corrosion Crack: II. Arrest in the Residual Stress Field at a Welded Joint in a Large Plate 471
E. SMITH (UK)

Probabilistic Strength of an Elliptical Bar Subjected to Torsion 477
P. KITTL, G. DÍAZ & V. MARTÍNEZ (Chile)

Publisher's Announcement 497
